

## HIGH QUALITY AEG PHOTOVOLTAIC MODULES AVAILABLE IN SOUTHERN AFRICA COUNTRIES FROM TODAY

**Official supplier of AEG solar products Solar Solutions GmbH teams up with South African distributor Sinetech for AEG module sales**

Frankfurt am Main / Johannesburg - October 24, 2017 – Germany-based Solar Solutions GmbH, official supplier of AEG solar modules, has forged a partnership with South African firm Sinetech. Sinetech will focus on distribution and commercial scale projects in South Africa and the neighboring SADEC countries.

Customers in the Southern African Development Countries can now rely on the quality and reliability of the AEG solar modules thanks to the partnership between Solar Solutions GmbH and Sinetech.

Sinetech will ensure Southern African customers have access to AEG solar products for the many years to come and they will form a “center of excellence” providing technological and engineering support to the region utilising their team of outstanding engineers.

AEG solar modules will also be available with the AEG Individual Module Monitoring “IMM” Technology as an optional feature. Thanks to the built-in Individual Module Monitoring (IMM) Technology, AEG solar modules are the only photovoltaic panels which monitor their own “health status” and actively inform the plant owner of any errors or malfunction occurring, in real time. Thus providing the plant owner with clear instructions on what action to take and when even providing return on investment figures for any modifications or replacements. The IMM system applies sophisticated analysis of artificial intelligence to data captured as it happens from each and every module in the plant from inside the beating heart of the solar module –inside the junction box.

Sinetech a well-known and highly valued name in the South African Renewables world, are specialists in the supply and installation of PV Solar Power Systems, UPS Systems, DC & AC Power Backup Systems, Solar Components, Inverters & Battery Chargers and is very proud to include AEG labelled modules in their product portfolio. Sinetech has earned a solid reputation for quality solutions over more than 20 years in the industry.

“Solar Solutions GmbH can’t imagine a better partner than Sinetech to further extend the reach and penetration of the AEG PV product portfolio in South Africa and beyond their technical expertise in this region is second to none” stated Stuart Brannigan, MD of Solar Solutions.

# AEG

## ABOUT AEG

Part of the AEG family with its hundred-year tradition as a leading German brand in the field of electrical appliances owned today by Electrolux Group, AEG quality photovoltaic modules stand out for their reliability, aesthetics and enhanced usability. Each AEG module is developed to be always an idea ahead in the world of smart solar to grant users full control over their yields and peace of mind. AEG modules integrate IMM as an optional feature, a smart technology for highly accurate monitoring at module level, enabling detection and prediction of performance issues from individual modules up to the whole PV plant. This allows for tailored O&M interventions, maximizing yields and driving down maintenance costs. AEG solar modules are distributed worldwide under license by Solar Solutions GmbH, Germany.

## ABOUT SINETECH

Sinetech was established in 1995 and is a leading direct importer and supplier of Power Protection, Power Conversion, Power Distribution and Renewable Energy products. The company is a major player in the Residential, Commercial and Industrial PV Solar markets. Sinetech's engineers have over 40 years' experience in the design and installation of power electronics, such as Backup Power Systems and UPS Systems. Sinetech is one of the largest distributors of inverters and other power products on the African continent and stock all major brands and components.
